#### Product Description

These Type 304 stainless steel post-frame ring shank nails are recommended for the application of preservative-treated skirtboards. They are also excellent for other applications in severely corrosive environments. (Note: For maximum protection, Type 316 stainless steel nails are available as the same part number but with a "316" suffix.)

Disclaimer: This image represents an entire series of nails, so the length may not be the exact match to the nail in this spec sheet
