<b>SHANK STYLE</b>	Ring Thread
<b>POINT STYLE</b>	50 degree diamond
<b>COATING</b>	Double Hot-Dip Galvanized
<b>APPROX. NAILS PER LB</b>	104.0

#### Product Description

Specially designed for split-prone woods such as cedar and redwood. Slim, sturdy shank and special blunt point virtually eliminate splits. STORMGUARD® double-dipped in molten zinc. Ring shank for additional holding power. Checkered head enhances paint adhesion on colormatched nails. High count greatly reduces per nail cost. Especially popular for sidings scheduled for finishing with paints or pigmented stains. For jobs that will be left natural or treated with a clear or semi-transparent finish, we recommend our Type 304 Stainless Steel "SLIM-JIM"® Nails. Note: Use Type 316 Stainless Steel Fasteners for the highest degree of corrosion-resistance in environments such as sea-coastal areas.

Disclaimer: This image represents an entire series of nails, so the length may not be the exact match to the nail in this spec sheet
