CAULK FERRULE CLEANOUTS WITH FRAME AND COVER

TAPER THREAD PLUG WITH SQUARE FRAME AND COVER

FUNCTION: Used to cover cleanout plugs concealed in walls. The square design is particularly adaptable to adjacent walls, floors, ceilings, etc., that are finished of material in straight line patterns. The anchoring lugs provide easy means for securing the frame to the wall construction. The face-of-wall cover (4434) is for tile, masonry, or dry wall construction and is usually installed on an opening provided in the finished wall. The flush-with-wall cover (4435) is for plaster or wet wall construction and is installed during the wall construction.
