FLORIDA APPROVAL LETTER

FL# 35022

December 8th, 2021

To whom this may concern,

QuickBOLT's strongest Top Mount, QB2, has been officially approved by the Florida Department of Business and Professional Regulations. Now that QB2 has been approved, solar installers in Florida can expect an even easier permitting process when submitting designs that include the QB2.

Florida is known for having notoriously high standards for building codes due to its High-Velocity Hurricane Zones (HVHZ), like in Miami Dade County. All new projects must meet a set of requirements to ensure products are secure when tested against these extreme weather conditions. Florida Product Approval Numbers (FL#) are the state measurement for these requirements. This approval requires going through a series of rigorous product evaluations.

QuickBOLT received its Florida Approval in January 2021 for their QB2 Kit with 3" Microflashing®, which mounts over asphalt shingle. Our Florida Approval included TAS 100(A) and Load Testing, which are the same tests required for Miami-Dade approval.

Corrina Roberts

SECTION 6

TEST PROCEDURE

Specimens were mounted to an Asphalt shingle covered nominal 2x6 Douglas Fir, with moisture ranging from 7% to 12%, frame. Vertical load was applied to the bearing block through a load cell attached to the testing machine. Test speed was 0.200 in/min. Displacement was taken with one linear transducer, attached to the frame, which were zeroed at zero load. Ultimate load was the maximum load the test assembly could withstand in that direction without deflection exceeding 1/8". See photographs in Section 10 for typical test set-up.
