MEASURING WHEELS MP SERIES—SOLID

METAL PROFESSIONAL SOLID WHEELS

There are advantages to solid wheels. A sliding tool box or a shovel in the back of a truck has destroyed the precision of many a spoked wheel. Solid plastic wheels are not nearly as susceptible to these impacts. Also, solid Keson wheels do not go “out of round.” You cannot bend them or flatten a portion of them. Lastly, twigs, sticks, tall grasses and other brush do not get caught up in the spokes or lock these wheels up. If your job takes you through fields or trails, consider a solid wheel option.

3/4-inch steel frame for superior durability

Heavy-duty barrel clamp, unit folds to 1/2 size

Our geared Mechanical Clicker Counter features easy-to-read numbers.

FEATURES < MP SERIES SOLID

- 1. No Spokes** to catch grass or sticks and won't bend or snap.
- 2. Solid Molded Wheels** do not bend or go “out of round.”

MP415

MP415

The counter measures feet and there are two scales molded into the hub of the wheel itself: inches on one side and 10ths on the other.

MP315M

On our metric version, decimeter graduations are molded into the hub of the wheel.

MP201

Strong, rigid, 1-piece steel handle — strongest in the industry. Without a collapsing point in the handle, there is no weak point on this frame. This solid wheel is two inches wide, giving it better traction on sand, loose gravel and wet ground; a favorite among landscapers.

Limited lifetime warranty.

MODEL	UPC 052837	UNITS	DIA.	CIRC.	SPECIAL FEATURE
MP201	008315	ft.	7-1/2 in.	2 ft.	Solid molded wheel
